

# **Biodiversity Policy**

At S P Setia, we recognise our role as a responsible property developer.

Our commitment extends beyond constructing buildings; it encompasses the preservation of biodiversity, the establishment of green spaces, and the well-being of our communities.

This policy outlines our dedication to sustainable practices and biodiversity conservation.

1. We identify and safeguard ecologically sensitive areas, ensuring the preservation of biodiversity, natural habitats, and endangered species.
2. We engage with communities, regulators, and experts to promote biodiversity awareness, foster partnerships, and support conservation initiatives.
3. We commit to restoring and rehabilitating degraded environments through habitat restoration, tree planting, and ecological enhancement efforts.
4. We integrate biodiversity-friendly practices into our planning, design, and construction processes to minimize environmental impact and promote sustainability.
5. We adhere to biodiversity-related regulations, industry best practices, and national sustainability commitments to ensure responsible development.

S P Setia is committed to creating sustainable, liveable communities that coexist with nature, ensuring a greener and healthier future through our biodiversity policy.
